

Sage 200 Workspaces

Workspaces in Sage 200

In just one day learn how to create your own high-impact views that incorporate data from Sage 200. Learn how to create and amend custom views allowing Sage users to view all of their relevant data on one screen. Workspaces is only available to users of Sage 200 2009 and later.

Preparation :

A general understanding of the Sage 200 Finance and Commercial application is required. An understanding of its underlying database structures would be beneficial but not necessary.
